

# SUSTAINABILITY IN THE voestalpine GROUP

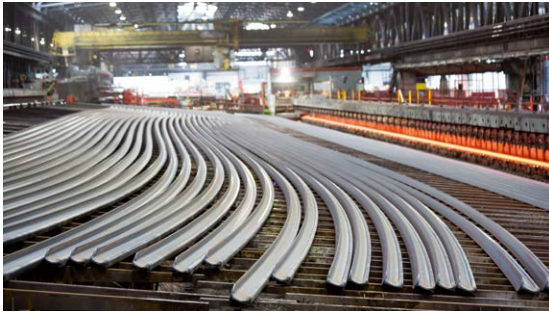

**voestalpine is globally leading steel and technology group and has been regarded for decades as the industry's environmental and efficiency benchmark.**

At voestalpine, sustainability is an essential principle in all decisions and activities. This extends across the entire product life cycle, from the procurement of raw materials to production and recycling, from education and training to the health and diversity of employees. The sustainability aspect also plays an important role in research and development; focal areas of research include circular economy, climate-neutral steel production, and sustainable products. The guiding principles and targets for voestalpine's economically, ecologically and socially sustainable operation are embedded in the Group's sustainability strategy.

## REDUCTION OF EMISSIONS

Based on 1 ton of crude steel over the past 3 decades

Sustainable and high-quality steel from voestalpine for modern living.

voestalpine has been actively fulfilling its economic, social and ecological responsibilities for many years. It supports the UN Global Compact – the world's largest and most important initiative for responsible corporate governance – and participates in industry initiatives dedicated to sustainable steel production, including ResponsibleSteel. voestalpine is also included in the international FTSE4Good Sustainability Index.

## STEEL IS INDISPENSABLE IN A SUSTAINABLE WORLD

Steel is one of the most widely used materials in the world and a sustainable society would be inconceivable without it. With products such as lightweight steels for the automotive industry, fully digitalized railroad infrastructure systems, and innovative steel solutions for renewable energy generation, voestalpine offers its customers sustainable products that make a positive contribution to sustainability in ecological, economic, and social terms over the entire life cycle. **recyclable.** Steel products are durable, easy to repair, and entirely recyclable.

addition, voestalpine attaches a high value to responsible and transparent supply chain management.

### greentec steel

voestalpine is continuously implementing measures to reduce resource consumption in steel production and has a long-term decarbonization strategy with greentec steel that will enable it to also help achieve the climate targets.
